Gaza, Gaza, 00970, PS

Full Stack Developer with hands-on experience building production-grade web applications, e-commerce platforms, and internal operational systems. Skilled in React, Next.js, Tailwind CSS, Supabase, Convex, database design, authentication, and API integration. Experienced in AI-assisted development workflows, AI-focused hackathon projects, frontend instruction, and technical mentorship. Currently expanding backend expertise through Laravel (PHP).

Work Experience

Freelance Frontend Developer Jan 2023 - Present

Remote

- Developed responsive, scalable websites using React, Next.js, and Tailwind CSS, including portfolio and marketing websites optimized for performance and accessibility.
- Integrated APIs, optimized frontend code for fast loading and maintainability, and designed UI/UX interfaces in Figma aligned with client branding and usability standards.

Frontend Instructor 2026 - Present

Zero to Hero

- Currently teaching frontend development fundamentals, covering HTML, CSS, JavaScript, and practical project-building workflows.
- Introduces students to AI tools that support frontend development, faster prototyping, debugging, and improved learning productivity.

Full Stack Developer (Volunteer) Nov 2025 - Feb 2026

Zero to Hero

- Architected and deployed a production-ready e-commerce platform using Supabase and Convex, with secure authentication flows and role-based access control.
- Designed and implemented a custom accounting and hourly billing system to automate workspace charge tracking and invoice generation.
- Managed the full software development lifecycle from planning to deployment, delivered stable production systems, conducted a Prompt Engineering workshop, and mentored a junior developer in JavaScript and React fundamentals.

Projects & AI Participation

Palestine AI Week 2026 Participant - Palestine TechnoPark & Gaza Sky Geeks Apr 2026

- Participated in AI Week 2026 and collaborated across two AI-focused product teams during the program.
- CivicMind: contributed to a web app that gathers citizen reports and uses trained AI models to evaluate report category, responsible department, and urgency level.
- Bookshelf: contributed to a mobile app that uses AI to summarize books, recommend books based on user reading history, suggest movies based on books read, and enable book-cover uploads to trigger the recommendation and summarization features.

Core Skills

Frontend: HTML5, CSS3, JavaScript, ES6+, React, Next.js, Tailwind CSS
Backend: Supabase, Convex, REST APIs, Laravel basics
Database: PostgreSQL, Database Schema Design
AI & Teaching: Prompt Engineering, AI Tools for Development, AI Model Workflow Exposure, Frontend Instruction, Technical Mentorship
Tools & Practices: Git, GitHub, Production Deployment, API Integration, Authentication & Authorization, Responsive Design, Performance Optimization
Additional: UI/UX Design, Figma
Currently Learning: Laravel, PHP Framework

Education

Islamic University of Gaza
• Previous Academic Background: Medicine

Al-Azhar University - Gaza Expected 2027
• Bachelor of Science, Computer Systems Engineering
